

Our priorities for a stronger recovery and more secure economy

Make it easier for women to re-enter the workforce after having children

Help ease the juggle for working parents, to unlock the economic potential of our workforce. Enable funding for kindy services to 'follow the child', as occurs in other States.

Relieve the burden of payroll tax on WA businesses

WA businesses face among the highest tax on jobs in Australia. It should not cost more to give a West Australian a job, than to give a South Australian a job.

Free Western Australians from shopping restrictions

Easing restrictions on shopping brings more foot traffic into retail precincts, builds retail turnover and creates jobs for young people.

Get ready to welcome international students, as soon as it is safe

Leverage our status as a stable, COVID-safe destination to attract international students back to study in WA.

Press into international markets

Establishing a WA Investment Dealbook, a physical trading post in the United States, and deepening the resources to support WA businesses find new markets.
